

# CC-250 Series

- **Ultra Fast at 250mm/sec**
- **ESC/POS™ Compatible out of the box**
- **Shipped with Power Supply and Interface Cable in the box**
- **High Resolution at 203 dpi**
- **Easy to install and to maintain**

## Affordable Price, High Speed & Quality Printer Series

Star Micronics is proud to announce the release of the CC-250. Star's CC-250 is an affordable, high-speed, direct thermal receipt printer.

With its simple design and lever-free paper loading, this printer is designed to outperform the competition in retail and hospitality environments. Its high speed processing of receipts (250mm/second), as well as, a dual interface and ability to fit a 10cm paper roll, makes it the first choice for retailers and hospitality operators globally.

The CC-250 is in 2 models making it easy for customers to select the appropriate model for their installation. A USB/Serial model and USB/Parallel model are available.

### 10cm diameter Paper Roll capacity

#### STAR 10cm ROLL PAPER SAVING ADVANTAGES

Paper Width	80mm	<b>80mm</b>
Outside Diameter	79.5mm	<b>102mm</b>
Core Size	12.7mm	<b>12.7mm</b>
Paper Thickness	65 microns	<b>65 microns</b>
Length of Paper on Single Roll	74m	<b>119m</b>
Increase over Standard Roll	0%	<b>60%</b>

Unique 10cm outside diameter paper roll capacity with 60% more paper on a roll which means fewer paper roll changes; decreased cost per receipt; reduced paper roll transport and storage requirements.

***No other manufacturer can offer all this!***

# CC-250 Specifications

**NEW Budget, High Performance, Affordable Receipt Printer** designed specifically to meet basic receipt printing needs.
